

YOUR VEHICLE IS PARKED IN A BICYCLE LANE

Your action/inaction is hazardous both to bicyclists and to your vehicle. Riders are forced to swerve into traffic to avoid crashing into your vehicle...if they see it in time.

Parking your vehicle in the bike lane makes cycling even more dangerous than already is, which discourages bicycling by other drivers and thereby increases the traffic congestion that you must deal with every day.

Please help to avoid traffic injuries or fatalities, as well as damage to your car. Please park in a driveway or on a side street. Thank you.

What is the point of having bike lanes if cyclists cannot actually use them?
